Eric Duncan

Action Items/Discussion

- **Review and Approval of December Meeting Minutes**

- **e-Health Summit Report**

Participants

- 250 attendees
- Attendees rated the Summit on average 3.7 where 3 is good and 4 is excellent
- All attendees indicated they felt the Summit provided a benefit to e-Health in Kentucky

Budget to date:

- Approximate funding (sponsors and registration fees): \$74,000
- Approximate expenses to date: \$50,000*

*Please note that this does not reflect the costs of labor provided by CHFS staff, web design and hosting costs, registration database programming and maintenance and printing.

3rd Annual e-Health Summit Planning

Recommended date late March or late April 2009

(Easter is April 12, 2009):

- Provides adequate time for planning
- Avoids conflicts with the Legislative Session

Recommended location Louisville:

- Provides a central location
- Provides a wide choice of venue

Next Steps:

- Seek suitable venue information and date availability
- Decision at March KeHN Board meeting

Kentucky's e-Health Vision

Daniel Mongiardo, MD
Lt. Governor

Kentucky e-Health Corporation

Corporation Report:

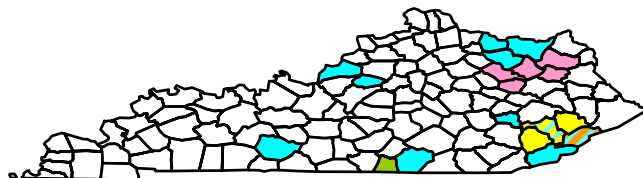

- 501 C3 Application
- Insurance for Board of Directors

HISPC Multi-State Collaborative

Kentucky will continue Health Information Security and Privacy Collaborative participation in two multi-state collaboratives:

- Harmonizing State Privacy Law
- Provider Education

HISPC Project Continuation

Federal contract funding of \$305,000

Project team:

- Cabinet for Health and Family Services
- University of Kentucky
- University of Louisville

Harmonizing State Privacy Law

Participating states:

- Kentucky
- Florida
- Idaho
- Kansas
- Michigan
- Missouri
- New Mexico
- Texas

Harmonizing State Privacy Law

- Phase I - Complete an inventory of state laws of participating states related to health information privacy, security and HIE.
- Phase II -
 - Create a subject-matter taxonomy designed to facilitate the collection and grouping of the varied laws from different states.
 - Analyze gaps in state laws using the populated subject-matter taxonomy.
 - Develop a ranking methodology to enable states to rank the relevance of various subject matter areas in the context of a HIE environment and apply the ranking methodology among the participating states.
- Phase III - Develop model statutory/regulatory language to fill identified gaps within existing law and develop key elements of a model act.
- Phase IV - Produce the final report, which will include the roadmap and toolkit to be used by other states that incorporates the inventory tools, taxonomy, and each HSPLC state's experience using the tools.

Provider Education

Participating states:

- Kentucky
- Florida
- Louisiana
- Michigan
- Mississippi
- Missouri
- Tennessee
- Wyoming

Provider Education Multi-State Collaborative

Develop a Provider Education Toolkit to:

- Enhance awareness of providers and inform, motivate, about the benefits of private and secure health information exchange.
- Address identified or perceived barriers regarding data security and inform providers about potential solutions that facilitate interoperable health information exchange.
- Engage providers to adopt and use standards-based, private and secure electronic health records and health information exchange to improve the quality of health and care for their patients.

Project Updates

- **2008-2009 Kentucky e-Health Network Board Work Plan**

Plan Duration: March 2008 – February 2009

Next Board Meeting

- **Next Board Meeting** – March 5, Capitol Annex
